B. WOOD ACQUISITION PLAN PROGRAM

Summary

The Forest Sustainability Regulations came into effect for the calendar year 2000. All Registered Buyers that acquired greater than 150,000 m^3 from privately owned forest lands in Nova Scotia during the 1999 calendar year were required to submit a Wood Acquisition Plan for 50 percent of that volume in 2000. All compliant Registered Buyers opted for undertaking a silviculture program for the year 2000, and submitted a summary of completed silviculture (Form C, Part V) for claim in 2000 along with supporting silviculture site location details.

The volumes from 1999 that required a Wood Acquistion Plan totaled 1.563 million cubic metres based on initial phase-in requirements (Table 1). From those volumes, a total of 3.842 million silviculture credit value was required in year 2000, and the summary reports indicated that 8.238 million silviculture credits were completed and claimed (Table 1). Industrial silviculture credits completed far exceeded credits required in 2000. Private silviculture completed also exceeded credits required in total, however, completed hardwood silviculture on Private was slightly less than credit value required (Table 1).

A total of 13,350 hectares of silviculture for a credit value of 8.238 million were completed and claimed in 2000 (Table 2). Established Plantation (Category 2), 60 percent and Natural Density Control (Category 5), 27 percent were the major silviculture activities claimed in year 2000 (Table 2). Softwood silviculture completed on all private lands was 94 percent of the total credit value claimed in year 2000 (Table 3).

A breakdown of completed silviculture by category and ownership is described in Table 4. Private woodlot silviculture value claimed in the Wood Acquisition Plans for 2000 totaled 3.220 million credits (Table 4). An additional 2.4 million dollars of silviculture was completed on private woodlots through voluntary Stewardship Agreements, provincial REFF funding and the Association of Sustainable Forestry in year 2000. Total private woodlot silviculture value completed in 2000 was 5.62 million. Industrial silviculture claimed through Wood Acquisition Plans for year 2000 totaled 5.02 million credits (Table 4). Total private land silviculture value in year 2000 from Wood Acquisition Plans reports and other funding sources totaled 10.64 million.

A summary of completed silviculture area claimed in year 2000 by silviculture category, ownership and species type is included in Table 5.
